Photographed Notes.—These are of a dull brownish color, and the engraving indistinct or blurred. Photograph bills are never black. A suretest of any note suspected of being a photograph is to touch it with a solution of Cyanide of Potassium when it will immediately fade out and turn white if it is a photograph.

Every counterfeit that has ever been made has one or more mistakes in it. Our aim is to show what that mistake is.

## NEW COUNTERFEITS.

St. Nicholas National Bank, N. Y. City.  
2s, imitation. Well done.

Auburn City National Bank, N. Y.

10s, imitation. The paper is good and will wear well. The front of the bill is quite well done, but the back is very much blurred—the left end of the centre engraving looking as rough as a brush heap.

Marine National Bank, N. Y. City.

2, imitation. The shading under the title of the bank is bad, otherwise the bill is very good and likely to deceive.

Tremont National Bank, Boston, Mass.

2s, imit. well done, and will easily deceive the unwary.

Gore Bank, Hamilton, Canada.

4s, a very close imitation—better refuse all bills of this denomination.

### 20s GREENBACKS.

A dangerous counterfeit. Green ink a good color, but the paper too yellow. Principal defect in the die. No clear and distinct lines around the 20. Looks more like a collection of several spots. Female well done, but the face rather coarser than the genuine.

Mutual National Bank, Troy, N. Y.

10s imitation. Well executed and likely to deceive. Shading of "United States" lighter than the genuine.

First Nat'l Bank, Louisville, Ky.

5s, imitation. Columbus at the left end of the note has no left hand. Engraving rather coarse and heavy.

First National Bank, Boston, Mass.

5s, imitation. Well done. Signatures engraved.

Tioga National Bank, Owego, N. Y.

50s raised from 5. Well done.

First National Bank of Boston Mass.

5s, imitation. The engraving is fine and well done. The signatures of the President and Cashier are engraved. The Seal of the Treasury is a fac simile of the genuine. Examine the wording of the penalty on the lower corners of the back of the note. The bill is well calculated to deceive.

Flour City Nat'l B'k, Rochester, N. Y.

10s, imit. This bill is well executed, and a dangerous counterfeit. The Die on the upper right end is very pale and has a speckled appearance in the imitation instead of a dark and lined appearance, as in the genuine; observe the small curved line under word "United"; in the imitation it connects the letters UNI, the genuine does not. The signatures are engraved, and the bill is  $\frac{1}{2}$  inch longer.

10s, imitation, (SECOND ISSUE.) Well done. The letters Roc in the word ROCHESTER, at the left end of the words FLOUR CITY, are quite indistinct in the counterfeit, but in the genuine they are clear and distinct.

Third National Bank, Philadelphia, Pa.

10, imit., letter B. Observe on upper right margin of the face of the bill the small words "National Currency" between small figures 10. The word "Currency" is spelled "Currency." The shading of the words "Will pay" and "to Bear" are heavy in the genuine but very light in the counterfeit. Also, the "P" in "Philadelphia" in imitation, runs below the rest of the letters. Genuine does not.

## FRAUDULEN BANKS.

### Lynn Park National Bank, N. Y. (No such bank.)

2s. Very well done.

### Nat. Union Bank of Linderpark, N. Y.

2s, (NO SUCH BANK) well calculated to deceive.

### Mechanics' National Bank of Janesville, N. Y.—(NO SUCH BANK.)

10s. A very good looking bill—look out for them.

NEW YORK, Nov. 24, 1868.

There is a very easy feeling pervading the Money Market. Business in general having been contracted for weeks past in consequence of the artificial money stringency, and the funds tied up for stock-jobbing purposes being now restored into full circulation, there are abundant funds seeking employment at six or seven per cent.

Gold after having been "hulled" from 132 to 137, has settled quite firmly at 134@135.

U. S. Bonds being relieved at present from stock-jobbing manipulations are firm. This market manifests its present healthier condition, by an increased demand for registered bonds. Of coupon bonds, 62s and 67s continue the favorites. State bonds, which had for some time past also suffered from the rotten condition of the market in railroad and miscellaneous stocks, are likewise firmer and in better demand.

As for the market in Railroad and miscellaneous stocks, this month has been one of the most eventful in its history. Powerful and unscrupulous "cliques" have alternately succeeded in rapidly and considerably "bullying" it up and "bearing" it down. Fluctuations of 10 and more per cent in one day being of frequent occurrence, while most of these stocks showed fluctuations of from 20 to 50 per cent. within this month. To effect such unreasonable changes, some of these cliques resorted to means, which, if used for the appropriation of paltry sums, would be sure to procure for the perpetrating "speculator" free lodgings in some State or Federal institution. The "street"—of course—has been "milked" by all these successive movements, although through the "Erie corner" some of the "insiders" have also been heavily fleeced, while many "outsiders" were fortunate enough to dispose of their shares at 60 or 62, for which 24 hours later they could not have realized more than 40 to 42. But it is to be hoped that the teachings of this month will have their good results.

Capitalists in general are already beginning to scrutinize the intrinsic values of securities, and to determine their investments by the earnings rather than by "make-believe dividends" and the market value of stocks.

Banks, having luckily escaped ruinous disasters, will refrain from certifying checks for amounts not *de facto* with them deposited, and when lending on dubious collaterals insist on margins wide enough to secure them in any emergency.

Yea, even the Stock Exchange Boards seem to have been forcibly aroused to a sense of their duty to themselves and to the public. A rule is to be adopted by them that within a reasonable time every company must have its transfer-hooks in the possession and under the control of some Trust Company or other institution, satisfactory to the Stock Exchange, before the securities of said company can be placed on the call or dealt in at either board.

For to-day's Stock quotation see page 3.

The Hon. H. R. Hurlburt, Controller of the Currency, in his annual report, which is nearly finished, renews his recommendations of last year for the redemption of all National Bank notes in New York, believing that the ultimate

redemption of all such currency is established beyond a question. It only remains to make them convertible. This can be done only by making them redeemable at a common centre, which should be the centre of trade. When this is accomplished, the amount of notes in circulation will be regulated strictly by the demand. When the volume shall be greater than is necessary to do the business of the country the banks will be called upon to redeem the surplus, and it will be retired. When trade is active, and more currency required, the banks will expand their issues, and redemptions will not be demanded until the season of activity is over. If all the banks are required to conform to a uniform standard of responsibility in this particular, the burden, being equally divided among all in proportion to their circulation, will be light, because the aggregate redemption at any given time will not exceed the surplus of notes in circulation, while if such a rule is not established, the burden will be unequally divided, falling most heavily on those banks which conform to the highest standard, compelling them by the frequent return of their notes to contract their issues, while at the same time the remote banks will be tempted to undue expansion, the temptation being the difficulty and expense of returning their notes for redemption. In this as in all other cases, the inferior currency will be the most abundant. Rigid, unflinching convertibility is the only safe rule, and in the end the most economical. It is an obligation on which every National bank owes to the system, to contribute its due share to the maintenance of circulation of uniform value. This it can only do by keeping its own issues at par in the great centres of trade. Any plan which is not comprehensive, thorough, and rigid, will fail. A half-way, doubtful, voluntary arrangement will not answer the purpose. The Government which authorizes the issue of bank notes for currency has a right to require all banks to conform to the highest standard. The currency of a country belongs to the people; and the Government, which represents the people, should see that the people have the very best currency possible. In his last annual report the Controller remarked that there was not at the time any immediate demand for the redemption of National bank notes, but it would be one of the healthiest evidences of returning soundness in our financial affairs if it should be begun. If legal tenders should command a small premium, it would begin. It would be the first step towards specie payments. It would mark an era in legal-tender notes, the date of their appreciation in value. At the same time it would be a healthy reminder to the banks that their circulation is a liability payable on demand. The Controller is opposed to the payment of interest on bank balances by New York city banks, and favors a return to specie payments. The report also shows the amount of taxes paid by the banks to their respective states and to the United States for the calendar year 1867, to be nearly five per cent on their capital.

#### Withdrawal of Mutilated Greenbacks.

WASHINGTON, Nov. 19.—The Treasurer of the United States has addressed the following circular to Assistant Treasurers, and designated depositaries of the United States:

TREASURY DEPARTMENT, TREASURER'S OFFICE, WASHINGTON, Nov. 19.—Sir:—You will please

select from the United States Legal Tender Notes that you may have on hand on the receipt of this, and from those that you may receive at any time thereafter all notes which are mutilated, and in your opinion so much soiled, defaced, or worn as to be unfit for circulation. Also all notes of the denomination of \$50. It is the desire of the Department, as these have been successfully counterfeited to withdraw all of this denomination from circulation.

You will also retain all notes issued under the Acts of February 25, 1862, and July 11, 1862, known as the convertible issue of Legal Tenders, or those bearing upon their back the legend of which the following is an extract: "And is exchangeable for United States six per cent. Twenty-year Bonds, redeemable at the pleasure of the United States after five years."

It is desirable to withdraw these notes as speedily as possible, as this office is daily in receipt of letters from individuals, who are still persistent in their requests to obtain bonds for them, although the time allowed for such conversion has long since expired, as the following clause from section 3, of the Act approved March 3, 1863, will show: "And the holders of United States Notes issued under and by virtue of said Acts shall present the same for bonds, as therein provided, on or before the 1st of July, 1863, and thereafter the right to exchange shall cease and determine."

You will then please hold all the notes mentioned, and advise me of the amount, that the same may be transferred here for redemption, and new notes issued in lieu thereof; or you may at any time remit them in sums of one thousand dollars or any multiple of that sum, through Adams' Express Company, or any express company connecting with that company, at Government expense, in the same manner as mutilated fractional currency is now forwarded to this office. All such remittances may be charged to this office in account as a transfer of funds; or you may receive, at your option, a check on New York, Boston, Philadelphia, New Orleans, San Francisco, or new notes of such denominations as you may designate will be transmitted to you in exchange by Adams Express, free of charge.

(Signed) F. E. SPINNER,  
Treasurer of the United States.

## COUNTERFEIT GREENBACKS.

1s, (1st kind) can be readily detected by the inferior style of the engraving, particularly the head of Chase. The mouth is crooked, the eyes imperfect, and the hair on the top of the head resembles side hair brushed over to cover baldness. The back is of a lighter green than the genuine.

1s, (2d kind) the general appearance is very coarse and may readily be detected; green ink is very pale. On the imitation there is a BLACK STRAIGHT LINE under the red figures on the upper part of the bill; none in gen.

2s, imit., well executed. Coat of Hamilton badly done. The shirt bosom of Hamilton is very dark and uneven, but in the genuine white and plain. The shading of the words "UNITED STATES" light and broken.

5s, 10s, genuine notes without the red seal, and others reported without the usual number being printed upon them.

5s, imit., words "United States" heavily shaded. Gen. are clear, lightly shaded and plain. The words "Patented 30th June, 1867," under the words N. York are not on the counterfeit bill. All the counterfeits are letter A, and are  $\frac{1}{4}$  inch shorter than the genuine.

On the new series of letter "A," around the figure of Liberty on left end is a plain black line. On the counterfeits, this line along the bottom of the figure running towards the right of the note forms two distinct lines, on gen. only ONE. But this

may be a counterfeiter's dodge to have it desribed and alter it afterwards.

5s, imit., this bill is well calculated to deceive, and the only difference we can detect is in the die on the right end enclosing the figure 5. The genuine has three black circles enclosing the 5. The imit. has only two, and no lower right end figure 5, and on left end eerlee 90.

10s. Paper very light, and the green ink of a lighter shade. Dated March 10th, 1863.

10s alt'd from 1s, portrait of Chase on left.

10s imit. There are 18 small X's on upper right margin, and only 15 on the genuine. The words "Printed by the National Bk Note Co." on lower left margin extends over 9 of the X's on imit. and 8 on the genuine.

10s, imit., has 14 small x's on upper right margin—16 on left. The gen. has 15 x's each side of engravers name. Portrait of Pres. Lincoln is very coarse and pale looking; imit. are dated Washington, March 10, 1862, letter O.

20s, very close imit. of gen., the engraving is good, in the center figure the foot of the female can scarcely be seen. On the left end bottom are the words "Payable at the Treasury of the U. S. at New York." The A's in payable are too small and uneven. The letter 'K' in the word 'The' is not crossed in the centre. The imprint is defective; the green ink is of too light a color.

50s, alt'd from 2s, portrait of Hamilton on left centre. The vignettes of the two-dollar and fifty-dollar Treasury note are the same. Ingenious persons are counterfeiting the body of the fifties and using the vignettes of the twos, producing a note that deceives experts.

50s, imit. observe the figures 50 on back of the bill around the margin, the 5 in the imit. runs into the 0, gen. does not. The word 'FIFTY' around the above 50 can scarcely be read. Words 'LEGAL TENDER' is very much blurred. Letter C dated March 3, '63. On the left lower corner the No. 550 instead of 50 enclosed in one circle.

50s, imit., observe the head of Hamilton, upon the face of the note, which represents the line of the waistcoat crossing the white collar at the neck. The acute angle formed by the shape of the collar, so far as it is shown, is perfect in the counterfeit note; but in the genuine the lines of the flesh were drawn by the engraver across the point of the collar at its junction with the waistcoat, for the purpose of relieving the angle of the sharpness it would otherwise have exhibited. This difference is not readily observed unless the notes are perfectly clean. The other discrepancy is in the shape of the ornaments in the border on each end of the face of the bills, and in the whole border on the back. The figures "50" are engraved on a green ground, of which the rim, in the genuine bill, is in octagonal form, rather well defined, though the angles are not sharp. The eight sides of what at first view appeared to be circles, may be easily discerned. In the counterfeit bill the border ornaments, containing the "50" are octagonal in only a very slight degree, and seem to be perfect circles. The general appearance of the counterfeit gives no indication of its true character.

100s, imit. the red figures are much larger than the figures of any Treasury Notes, the wings of the eagle are very coarse—the double rule running from it is heavier, and the curve twice as large, while there is a diagonal shading at the joint of the imprint with the rule, which does not appear on the genuine. On the right end of the back of the bill, the 100 in the circles are inverted, thus, 001. In the genuine this inversion is on the left end. The imprint, American Bank Note Co., is very uneven, and too large.

100s, imit., (2d kind) of the notes issued under the act of February, 1862, well executed. The spurious note is smaller, and the coloring on the back is paler than on the genuine bill. The words "one hundred dollars" on the right hand side of the counterfeit are smaller than on the genuine note.

100s, imit., (3d kind) the note is smaller than the genuine, the spread eagle is very coarse, and the shading of UNITED STATES is badly done. The bill is calculated to deceive.

## COUNTERFEIT COUPONS.

The following are the words on the coupons: "Acts of July 17 and August 5, 1861. The United States of America will pay to bearer fifteen dollars for six months' interest due 1st January, 1867, upon bond No. 785, for \$500. L. E. Chittenden, Register United States Treasury.

FIVE CENT COIN COUNTERFEITS

Are in circulation. They may be distinguished from the genuine by the softness of the metal

## COUNTERFEIT

## FRACTIONAL CURRENCY.

## Old Issue.

50s, imit., the portraits of Washington differs one from another; in the genuine they are all alike; the green color looks light and pale.

25s, imit., well executed. Look out.

## 2d Issue.

10s, imitation. All gen. on the top has the words "Depositories," the imitation reads "Depositories."

50s, imit., have a pale slate color. The small barrels on lower right corner are very indistinct. The gen. have six barrels perfectly clear and plain. Three on lower row, two on next, and one on top. The counterfeit barrels are black, and gen. are white.

50s raised from 5s.

## 3d Issue.

50c. imit.; two kinds of the new long 50 cent currency. The imitation of one kind has DISINTEGRATED on upper right corner instead of DESIGNATED. The second kind has designated correctly spelt, but on the little American Shield, under the Eagle, there is a black line drawn across the upright bars of the Shield. Not so on the genuine.

25s, imit., are very pale and coarse. The letter C in cents on left end is smaller than the other letters, and too far off.

## New Issue.

25, imitation. Above the words "Treasury Department," on the bottom of the bill in the genuine there is a fine dotted line—the counterfeit has a straight line.

25s, imit., well executed, but may be detected by the absence of a period (.) after the word Treasurer under Spinner's name; the work is better than any we have previously seen and liable to deceive unless carefully examined.

50s, well executed; head of Chittenden; where it reads "Furnished only by the Assistant Treasurer" the Assistant is spelt "Assistant." In the genuine the shading of the letter "E" in "Five" is unbroken, while the counterfeit has a little notch in it.

50s, well executed. The engraving on the face of the note is excellent. The adverse is slightly blurred. The notes are an eighth of an inch narrower than the genuine.

50s, the "y" in "Colby's" name crosses a line of the coat in the genuine, but not in the counterfeit.

50s, the line of stars on counterfeit between the figures "50" at the top and bottom of the back of the note have white centres, while the entire stars on genuine are in green. The reading in black on the genuine note clear and distinct, while on the counterfeit the bronze is printed on the black, the words "FIFTY CENTS" being almost obliterated.

50s, well done. The last "e" in the signature of F. E. Spinner is omitted in some, and the (.) after print. on one end, and the d. after March 30.

50s. New and dangerous counterfeits of the last issue of the fifty cent fractional currency note, which bear upon their face the head of Treasurer Spilner, have been detected by the Treasury Department. It can be detected by the absence of a period (.) after the word print on the right end, and also under the letter "d" in "March 3d," on the left end. The paper is thicker than that of the genuine notes, and the general appearance is calculated to deceive unless closely inspected.

## Counterfeit Compound Interest Notes.

50s, imit., Compound Interest Notes, have a scratchy appearance, issue of July 1st, 1864. In the imitation the words "three years after date" on the top of the bill nearly touch the words "Treasury Department," while in the genuine there is a space of  $\frac{1}{2}$  of an inch between.

2d. In the imit. the last button of Hamilton's coat is  $\frac{1}{2}$  of an inch from the lower margin of the small 50s, while in the gen. the button touches the margin.

100s, Counterfeit 6 per cent. Compound Interest Notes. The engraving as well as the paper and the ink stand the comparison to the genuine. The "U" in "United States" touches the die of the "100" on the left upper corner; on the genuine there is a space of  $\frac{1}{2}$  of an inch between.

### COUNTERFEIT 7.30 BONDS.

**First.**—The seal is slightly larger than the genuine; the red ink with which it is stamped is a shade lighter, and the points projecting from the seal are blurred and a little longer than the genuine.

SECOND.—The imprint at the bottom of the face of the boud is set different in the margin, there being more space given it than in the general.

THIRD.—The borders of the coupon which are attached to the counterfeit bonds are larger, while the red figures are finer than in the genuine.

FOURTH.—The borders of the ornamental lathe work are blnrred and somewhat indifferently executed.

FIFTH.—The figures denoting the bond are slightly uneven, while the blue ink in which they are printed is a duller blue and lacks the metallic glossiness of the genuine.

Sixth.—The lines forming the right-shoulder of the initial in the central vignette do not come up to the sword, but leave a white space. In the genuine note the lines are not only more numerous, but they come clearly and distinctly up to the sword.

On the back, the cycloid work upon which the words "pay to bearer" are engraved is much darker and heavier on the counterfeit than on the genuine; the counterfeit lines are rough, while the genuine are sharp and clear. In the date of the option the "Th" after June 15th is nearer to the figures 1868 in the genuine, while in the counterfeit the "Th" is some distance from the figures.
